PROFESSIONAL SUMMARY

Information Technology undergraduate specializing in Data Science at SLIIT Northern Uni, passionate about transforming data into intelligent, real-world solutions. Through projects involving AI-driven scheduling systems and secure application development, I have developed a strong foundation in analytical thinking, problem-solving, and system design. Eager to contribute data-driven insights, adapt quickly to new challenges, and create meaningful impact in a dynamic data science environment.

EDUCATION

B.Sc. (Hons) in Information Technology – Specializing in Data Science 2024 – Present

Sri Lanka Institute of Information Technology (SLIIT)

St. John's College, Jaffna 2011 – 2023

G.C.E. Advanced Level (Commerce Stream)

TECHNICAL PROJECTS

Intelligent Pharmacy POS & Inventory Management System / *Lead Developer* / *Academic Project*

Tech Stack: React, Vite, Electron, JavaScript

- Served as Lead Developer heading end-to-end architecture design and cross-functional team execution workflows.
- Engineered integrated point-of-sale (POS) and inventory management modules, streamlining critical retail operations.
- Implemented robust desktop integration patterns utilizing Electron to deliver an optimized, low-latency UI solution.

SmartClinic – Mobile Healthcare Management Platform / *Lab Test Module Developer* / *Academic Project*

Tech Stack: React Native, Expo, Node.js, Express, MongoDB

- Designed and deployed a modular cross-platform Lab Test tracking architecture for clinical ecosystem integration.
- Developed scalable RESTful APIs enabling security, authenticated laboratory report uploads, modifications, and background updates.
- Built responsive frontend views for real-time patient clinical history timelines, boosting medical record retrieval speed.

Automated Arduino Chess Board | Hardware & Firmware Developer | Academic Project

Tech Stack: Arduino Mega, C++, Arduino IDE, Embedded Systems, Reed Switch Integration, Multiplexer-Based Sensor Matrix, Stepper Motor Control, Electromagnetic Actuation.

- Conceptualized and built an autonomous chess physical prototype using an Arduino Mega microcontroller.
- Engineered an explicit 64-square hardware detection system matrix incorporating multiplexers and magnetic reed switches.
- Programmed real-time physical pathfinding routines to orchestrate stepper motor movements and precise electromagnet actuation.

ACADEMIC ACHIEVEMENTS

Research Poster Presenter | Sales Forecasting Model Using Historical Insights (2025): Presented a research poster on sales forecasting using historical data insights.

TECHNICAL SKILLS

- **Data Science & Analytics:** Statistical Modeling, ANOVA, Predictive Analytics, Confidence Intervals
- **Languages:** Python, C++, Java, JavaScript (ES6+), SQL
- **Frameworks & UI:** React, Vite, Electron, Node.js, Express.js, React Native, Expo
- **Databases & Storage:** MySQL, MongoDB
- **Tools & Architecture:** Git, GitHub, RESTful APIs, JWT Authentication, UML System Modeling

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **Treasurer | Northern Uni Students Committee (2026 – Present):** Manage regional student activity budgets, asset records, and institutional audit trails.
- **Active Member | AIESEC in SLIIT (2025):** Participated in global youth network projects, driving community impact workshops and soft skills tracks.
